# Update Glyphosate Litigation

#### // We are convinced of Glyphosate's safety profile

#### 11 January 2019: Health Canada confirmed a re-evaluation decision on glyphosate in 2017:

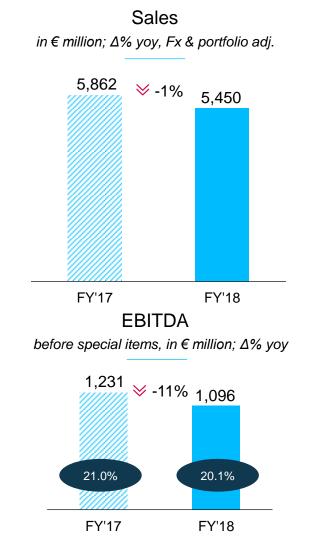

"After a thorough scientific review, we have concluded that the concerns raised by the objectors could not be scientifically supported when considering the entire body of relevant data. (...) No pesticide regulatory authority in the world currently considers glyphosate to be a cancer risk to humans at the levels at which humans are currently exposed."

#### 14 January 2019: German Institute for Risk Assessment (BfR) on the independence of European institutions and the assessment procedure:

"The sole criterion for the consideration of study results is the scientific quality and evidence of the studies. Possible interests of the party commissioning the study, politics or other interest groups can not and must not play any role in a scientific assessment. For this reason, the BfR and European assessment authorities (....) validate the original listed studies."

- // Lawsuits from approx. 11,200 plaintiffs as of January 28
- // Johnson trial: Appeal has been filed
- // Hardeman trial started on February 25
- // Currently 7 trials scheduled in 2019: 2 in Q1 (Hardeman trial and one more mid March), 2 in Q2 and 3 in H2
